

Male Quick-Connect Adaptors

Function:

Male quick-connect fittings are designed to be used on all brands and styles of quick-connect gas outlets. The most common types are shown below. The advantage of the quick-connect male adaptor is the easy snap in/snap out connection it offers.

Features:

- Fast and easy to connect and disconnect
- Color coded, labeled and indexed for specific gas services
- Available in NPT and hose barb styles
- 100 psi maximum working pressure

How to Order:

Ordering Examples:

QM-124-2 = Ohmeda style male adaptor, Oxygen, 1/8" npt male

QA-116-4B = Chemetron – style male adaptor, Air, 1/4" hose barb

Adaptor	1/8" npt male	1/4" npt male	1/4" hose barb
 Ohmeda™ style male adaptor	QM-1XX-2	QM-1XX-4	QM-1XX-4B
 Chemetron style male adaptor	QA-1XX-2	QA-1XX-4	QA-1XX-4B
 Puritan style male adaptor	QP-1XX-2	QP-1XX-4	QP-1XX-4B

Substitute "XX" with the following gas services:

04 = Nitrous Oxide 16 = Medical Air 22 = Vacuum 24 = Oxygen
