

400 Series Connect2® Medical Gas Outlets

Elements

- Accepts both Chemetron® and Ohmeda® adapters in the same outlet
- Conforms to NFPA 99 and CGA standards.
- Safety keyed to help prevent cross-connections
- Rough-in channel box protected by metal plaster guard until final assembly
- Adjustable valve mechanism to compensate for variations in plaster thicknesses up to 3/4"
- Cleaned for oxygen service
- UL listed and CSA approved

Description

The Allied Connect2® medical gas outlet stations provide convenient access to medical gases in patient care locations. They accept either a Chemetron or Ohmeda adapter in the same outlet.

Finish plates are color-coded plastic with stainless steel inserts. Outlet finish plates and rough-in plates are safety keyed for positive cross-connection prevention. Primary valves are separate from the finish plate, allowing easy testing for leaks and cross connection. Primary valves are made of brass and contain a self-sealing poppet. Primary valves are field adjustable to compensate for variations in plaster thickness of 1/2" to 3/4". Outlets may be special ordered with extended valve bodies that allow for an additional 3/8" or 3/4" adjustment.

The type K copper inlet tube has a 1/2" OD connection. The primary gas check can be serviced without shutting off the gas supply.

The outlet stations are fully compliant with NFPA 99 and CSA Z-305, and are cleaned for oxygen service in accordance with CGA G-4.1. The outlet is UL listed.

Release is easily accomplished with one hand using a push-button release (or twist release for Ohmeda style adapters). The primary valve poppet provides a dust-proof seal. Vacuum outlets maybe used with or without slide brackets for vacuum collection bottles of up to 1/2-gallon capacity. (Where slide brackets are used, order one per vacuum outlet.)

Materials

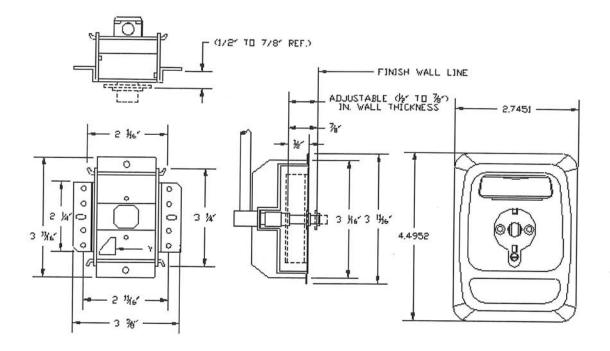

Component	Material		
Valve Body	Machined Brass Viton Seal		
Valve Block	Brass Forging/Machined Brass Type K or L Seamless Copper Tube Viton Seal		
Outlet Box	20 Gauge Steel		
Cover Plate	Plastic Color-Coded Fascia Brushed Stainless Steel Inserts Buffed Edge Plastic Color-Coded Release Button
