580 Series Electrical Devices

Elements

- Conforms with NEC requirements

- Hospital grade receptacles

- Modular design

- Combines with Chemetron® 500/560 Series Medical Gas Outlet Stations

- Blank modules for custom services

- UL listed components

Description

The Chemetron 580 Series modular electrical devices provide a convenient method to provide electrical services in patient care locations. They gang with any modular outlet or another modular electrical device to provide a finished console.
The modular electrical devices are field-gangable in any order desired by the facility.

The devices include the electrical mechanism and two-gang galvanized steel electrical boxes mounted in a zinc-plated steel mounting plate for corrosion resistance and fire safety. Finish plates are die-cast zinc, chrome-plated for appearance and to match Chemetron modular gas outlets. A blank version is available for field punching to mount non-standard devices.

Ordering Information

Catalog Number	Quantity	Device Description
64-07-0001		120V 20 AMP 23000HG Twist Lock
64-07-0010		120V 15 AMP 8200HG Ivory Duplex
64-07-0011		120V 15 AMP 8200HG Red Duplex
64-07-0020		120V 20 AMP 8200HG Ivory Duplex
64-07-0021		120V 20 AMP 8200HG Red Duplex
64-07-0030		120V 15 AMP 8200HG SC62 Safety Ivory Duplex
